

ITAM Robot

Voice, Data & Mobile TEM/WEM/NEM

Our patented solution is able to discover and build an extended CMDB of your infrastructure, each component of your voice, data, video and mobile network ensuring that the services being paid for are actually there, working, contracted and configured correctly.

Voice, Data & Mobile TEM/WEM/NEM

How do you know what you are paying for is correct?
How do you validate billing?

How do you build an accurate inventory?

How do you know the bandwidth you are paying for is configured and utilized correctly?

How do you manage the business process to provision and De-provision network assets?

New TEM/WEM/NEM (Network Expense Management) Changes the Game

Avotus's Voice, Data & Mobile Mobile TEM/WEM/NEM solution allows you to take full control of your IT & Telecom

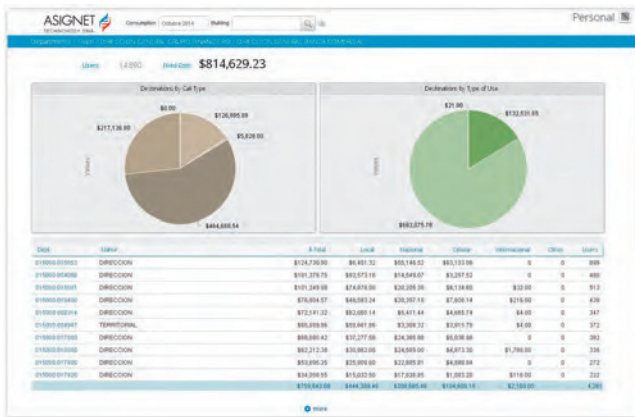

HOW: By Automating & Connecting Services, Devices and People through Business Process

How it works?

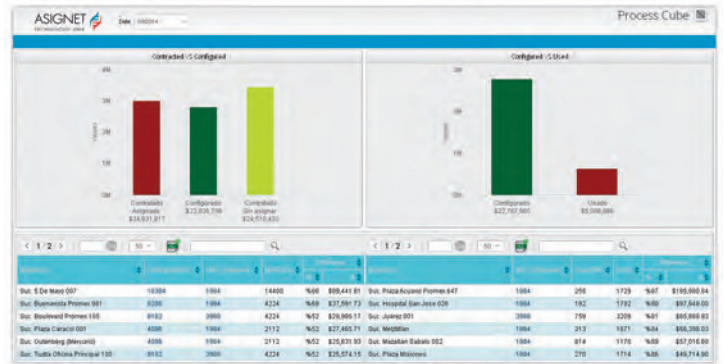

Self-Awareness

We implement different methodologies and tools to induce awareness about, how IT & Telecom services impact the budget and the company's bottom line. This awareness is managed at a corporate, department and individual level showing users how they can contribute to optimizing corporate resources. Implementing our Self -Awareness Services will reduce cost and increase productivity. (Up to 35% of spending)

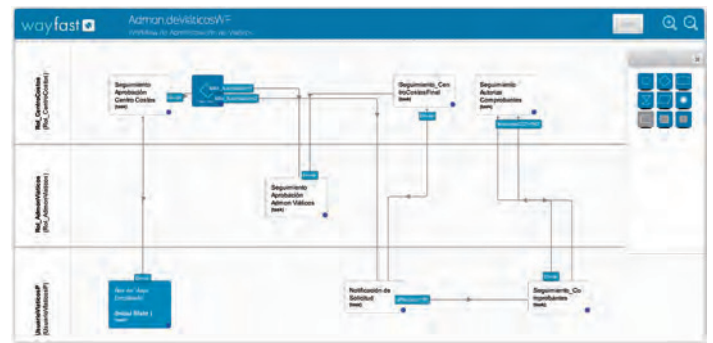

Full control of the IT & Telecom network (True CMDB Inventory)

Our patented solution is able to discover and build the true CMDB of your infrastructure, each component of your voice, data, video and mobile network ensuring that the services being paid for are actually there, working, contracted and configured correctly.

Business Process and workflows

Translating business process to standard work flows is carried out with greater speed. This process allows traceability, scalability and accountability providing real time information and much added value for making making decisions.
