

Avotus to Showcase Enhanced Usage Reporting Solution for Unified Communications at Cisco Live

Avotus' Enhanced Usage Reporting (EUR) for Unified Communications (UC) offers advanced reporting and analytics, including security, oversight, compliance, fraud prevention and more

LAS VEGAS, July 11, 2016 – Today at Cisco Live, Cisco's annual IT and communications conference, Avotus Corporation, the leading provider of Intelligent Communications Management (ICM) solutions, announced its superior level of visibility and reporting for Unified Communications applications. Enhanced Usage Reporting for UC (EUR UC) allows communication managers and CIOs to gain unprecedented visibility into the full suite of Unified Communications features including: Instant Messaging (IM), Presence, Voice, Wireless, and Video Conferencing with one fully integrated and streamlined tracking and reporting platform. Learn more about Avotus' EUR for UC now at Cisco Live, Cisco's annual IT and communications conference, July 10-14, 2016 in Las Vegas. Visit Booth C6, located in the Collaboration Partner Village.

EUR for UC Vendor Integration Features

- Cisco certified up to Cisco Unified Communications Manager (CUCM) 10.5 and integrated with all CUCM versions up to 11.5
- Unified Communications and Collaboration reports for detailed usage of voice and video calls, conference calls (audio/video), IM, file transfers and mobile usage with drill-down to each employee, department or location
- Cisco Unified Presence reports protect against data breaches by tracking IM and file transfers, which can introduce security vulnerabilities into the enterprise
- EUR for UC can be deployed in either a cloud- or premise-based installation and expands on the company's legacy of integration with over 130 models of PBXs.

"Unified Communications deployments are as common as POTS lines were 20 years ago," states Avotus CEO, James Martino. "Yet many enterprises might not be aware of the significant security and abuse risks inherent in these deployments. The same UC tools that enhance productivity can be easily used to circumvent firewalls and share confidential intellectual property. Avotus has been providing visibility, data management and savings for corporate voice networks for over 30 years. EUR for UC is a natural and critical solution for today's enterprise. Clients simply install their favorite UC platform, in concert with our EUR for UC, mitigating these risks and protecting their communications environment."
