

Avotus Unveils Next Generation Call Accounting Solution:

Intelligent Communication s Management Usage Management 8.3

MISSISSAUGA, Ontario – May 07, 2012 – Avotus Corporation, leading provider of secure, reliable, and complete communications management solutions, today announced the full commercial launch of its next generation usage management solution, Usage Management 8.3 (UM 8.3).

Designed to take call accounting to a new level, UM 8.3 brings to the industry a new dimension of usage management with advanced reporting and enhanced KPI tracking capabilities. The solution provides an easy, simple and intuitive GUI, offers support for Cisco and Avaya systems and is compatible with multiple browsers and latest SQL and Windows editions.

“Avotus customers are rapidly transforming their communication environments to enable augmented savings, enhanced data security and greater flexibility,” said Sumer Shankardass, CEO of Avotus. “With the launch of U M 8.3, Avotus accentuates its commitment to support customers in this transformation by providing a simple, secure and robust solution optimized for their communication environments.”

The new solution goes far beyond standard call accounting solutions to enhance efficiency and improve enterprise communication management with Avotus’ cutting-edge technology. UM 8.3 boasts of a wide array of high-end features that helps enterprises understand, organize and track their communication spend across fixed lines, mobiles, VoIP & TDM-based links.
